SREELAKSHMI PM

Linux System Administrator | RHCSA & RHCE Trained | Automation | Idukki, Kerala|

+91 9745928203 | lsree117@gmail.com | LinkedIn | Github

Professional Summary

Aspiring Linux System Administrator and MCA graduate with hands-on training in Linux administration and Red Hat Enterprise Linux (RHEL 9). Skilled in RHEL-based system administration, system security, user and permission management, LVM, system services, networking, shell scripting, and Ansible automation. Familiar with server configuration, security hardening, service deployment, monitoring, and troubleshooting Linux environments while following system administration best practices. Currently strengthening practical skills in Linux server management, automation, and infrastructure operations.

Technical Skills

- Linux & System Administration: RHEL 9, AlmaLinux, Rocky Linux 9, Ubuntu, User & Group Management, Access Permissions, Process Management, Systemd Services, Package Management (YUM/DNF/RPM)
- Storage & File Systems: LVM, Disk Partitioning, File System Management, Persistent Mounts
- Security & Access Management: SELinux, firewalld, SSH Hardening
- Networking: TCP/IP, IP Addressing, DNS, DHCP, iptables.
- Automation & Scripting: Ansible (Playbooks, Ad-hoc Commands), Bash Scripting, Cron Scheduling
- Web Servers: Apache HTTP Server, Nginx, Static Website Hosting
- Monitoring & Troubleshooting: CPU, Memory & Disk Monitoring, System Logs, Service Troubleshooting
- Tools & Virtualization: VMware Workstation, VirtualBox, WSL, Git, GitHub, Vim, Nano.

Experience

Linux System Administration Trainee

IPSR Solutions, Kottayam | June 2026 – Present

- Completed RHCSA and RHCE training focused on Red Hat Enterprise Linux 9 administration.
- Practised user and group management, file permissions, storage management, LVM and Filesystem Configuration.
- Configured and managed Linux system services, SSH access, firewalld, and SELinux.
- Performed network configuration and troubleshooting using Linux networking utilities and NetworkManager.
- Practised Ansible automation using inventory files, ad-hoc commands, playbooks, and SSH-based remote management.
- Configured and managed Linux virtual machines using VMware Workstation.

Projects

1. Linux System Administration – Practical Challenge | RHEL 9

- Configured static IP addresses and network settings using NetworkManager (nmcli).
- Managed Linux users, groups, sudo privileges, account expiration, and directory permissions.
- Configured SSH access and managed system logging and monitoring.
- Configured GUI and remote desktop access in a Linux environment.

2. Linux Web Server Deployment & Monitoring | Nginx, Rocky Linux, firewalld

- Deployed and configured Nginx on Rocky Linux to host a static website.
- Created a custom index.html page and validated web content delivery using curl.
- Managed Nginx services using systemctl and configured HTTP access through firewalld (TCP port 80).
- Monitored listening ports using ss and troubleshot web server connectivity and configuration issues.

Certifications & Training

- **RHCSA (Red Hat Certified System Administrator) -** IPSR Solutions Ltd, Kottayam
- **RHCE (Red Hat Certified Engineer)** — IPSR Solutions Ltd, Kottayam

Education

- **Master of Computer Applications (MCA)** **2024-2026**
  APJ Abdul Kalam Technological University
  College of Engineering,Cherthala
  CGPA: 8.67

- **Bachelor of Commerce (B.Com) with Computer Applications** **2021-2024**
  Mahatma Gandhi University, Kottayam
  Sree Sabareesha College Murikkumvayal

Languages

- English , Malayalam
